

# Digital temperature indicator JDI-0 / -08, DIN built-in housing

### Technical data

**Operating voltage:** 230 V~, 50/60 Hz  
**Sensor:** PTC resistor  
**Ambient temperature:** -20 ... +50°C  
**Degree of protection:** IP 20 (front)  
**Protection class:** II

### Application

Can be used as thermometer if applied in combination with a remote sensor.

**Sensors are not included in the scope of the delivery.** (For choice of sensors available, see as of page 99).

Application of sensor types according to sensor no. indicated (i.e. all no. 51 sensors can be applied, e.g. HF-51 or LF-51, etc.).

Avoid parallel laying of sensor line and mains supply cables or protect it by shielding.

Type	Item No.	Indication range	Equipment	Measuring points	Sensor	PG
JDI-0	D 4780306	-40 ... +120°C	3-digit indication without decimal	1	51 (PTC 1 K)	F
JDI-08	D 4780395	-40 ... +120°C	3-digit indication without decimal, max. 8 measuring points can be inquired by means of a rotary switch	8	51 (PTC 1 K)	F
